

MAY 2026 NEWSLETTER

Dear FAM-ily!

As we continue through the school year, we are excited to share some of the ways our students, families, and programs have continued growing throughout May. From career exploration and safety training to parent education and technology expansion, every activity helps us create stronger opportunities for the future.

Career & Future Planning

Following the vocational assessments completed earlier this year, students have begun reviewing their results and exploring potential career paths. These conversations help students better understand their strengths, interests, and educational opportunities as they prepare for life after graduation.

Student Safety

During May, students participated in training on Biosafety Standards and Safe Laboratory Practices, reinforcing the importance of risk prevention, proper use of equipment, and safe learning environments. These sessions help prepare students for both academic success and responsible professional practice in their future careers.

Parent Education

As part of our Parent School program, families participated in a workshop on the Rights and Responsibilities of Children and Adolescents and the Responsibilities of Parents, led by our educational advisor.

We believe education is a shared effort. By supporting parents, we help strengthen the home environments that contribute to student wellbeing, development, and success.

Raffle in Guate!

We are excited to launch our fundraiser, "Planting Opportunities." With 15 prizes and over \$1,000 in donated prizes, every ticket purchased helps support educational opportunities our students.

Drawing Date: August 28th, 2026

Thank you to all the businesses and supporters who donated prizes and continue investing in our kids' futures.

FOLLOW US

Thank you for being part of the FAM family. Your generosity, kindness, encouragement, and support help create opportunities for our students.
