

# APRIL 2026 NEWSLETTER

## Dear FAMily!

April has been a month focused on helping our students look ahead, strengthening their decision-making skills, exploring future career paths, and continuing to apply what they learn in meaningful, real-world ways.

## Discovering Their Future

Our students completed vocational assessments designed to help them better understand their strengths, interests, and potential career paths.

In the coming weeks, they will meet with Sara García to review their results and receive personalized guidance as they begin making important decisions about their future.

## Making Better Decisions

Students also participated in the "Big Decisions" training, where they explored key topics related to decision-making, personal responsibility, and life planning.

These sessions are an important part of preparing our students not only academically, but also for the real-life choices they will face.

## Expanding Access to Technology

Thanks to a generous in-kind donation, we have added 6 new laptops to our computer lab, strengthening our ability to provide students with greater access to technology.

This expansion allows more students to participate in digital learning activities, complete assignments, and build essential computer skills that are increasingly important in today's academic and professional environments.

By continuing to improve our technological resources, we are helping ensure that our students are better prepared for future opportunities and equipped with the tools they need to succeed.

## Learning by Doing

Our students in the health and medicine diploma continue to strengthen their learning through practical courses, where they apply what they learn in real-life situations.

These hands-on experiences help build confidence, skills, and a deeper understanding of their future professions.

Each of these moments represents a step forward, helping our students build confidence, explore opportunities, and prepare for the future. Thank you for being part of this journey.
